

HJCF Cash Management Pool

Investment Objective for the Cash Management Pool

The Cash Management Pool is structured for donors who are not concerned with achieving high, long-term investment returns, but are focused on capital preservation and the mitigation of short-term portfolio volatility. This portfolio will be allocated approximately 100% Cash and Fixed Income investments.

Disclosure:

Past performance is not necessarily an indication of how the Investment Portfolio will perform in the future. It is possible that the pools could lose money in future periods. Returns reflect the reinvestments of dividends and capital gains. Information utilized within the fact sheets was provided by a variety of sources. Although these sources are deemed reliable (i.e. Morningstar, Lipper, custodial statements), though not independently verified. The fact sheet(s) do not represent a specific investment recommendation. Please consult with your advisor, attorney and accountant, as appropriate, regarding specific advice.

Returns represent total returns, are net of fees and annualized for periods greater than one year. The Weighted Average Annual Yield and Expense Ratio for the underlying funds is calculated based on an asset-weighted methodology, using each managers current target weight, 12 month yield and expense ratio, respectively. All pool-specific investment returns are presented net of investment-related costs, including investment manager expenses and Fiducient advisory costs, but do not reflect any administrative expenses the Houston Jewish Community Foundation may charge to pool participants. Benchmark returns are reported gross of fees and expenses and assumes the reinvestment of all distributions.

HJCF Conservative Balanced Pool

Investment Objective for the Conservative Balanced Pool

The Conservative Balanced Pool is structured for donors who are less concerned with achieving high, long-term investment returns, and more focused on capital preservation and the mitigation of short-term portfolio volatility. This portfolio will be allocated approximately 80% Cash and Fixed Income investments (Bonds) / 20% Growth investments (Equities), and will consist of a variety of asset classes, including allocations to non-traditional investments like Real Estate and Broad Real Assets, as well as Core U.S. Bonds, Dynamic U.S. Bonds, Global Bonds, and High-Yield Bond Investments. The Conservative Balanced Pool will also employ a mix of both active and passive (index) approaches to investment management in an effort to enhance returns in the various asset classes.

HJCF Index Growth Pool

Investment Objective for the Index Growth Pool

The 'Indexed Growth Pool' is designed to provide donors a moderate balance of growth and income over the long term. The portfolio is currently allocated approximately 60% to traditional Global Equities and 40% to high-quality, Investment-Grade U.S. Bonds and Cash. With an eye towards simplicity, the portfolio focuses exclusively on utilizing lower-cost, passive index investment vehicles such as exchange-traded funds (ETFs), and aims to avoid any exposure to alternative-type investments such as Real Estate, Commodities and Broad Real Assets / Infrastructure Investments. The primary objective of this pool is to gain broad exposure to the most common and recognizable asset classes at a lower cost. While the pool seeks to be the simplest and most straight forward option for donors, it lacks the broader diversification and higher return potential of the Growth and Aggressive Growth Pools.

HJCF Growth Pool

Investment Objective for the Growth Pool

The 'Growth Pool' is a broadly diversified portfolio designed for donors seeking greater diversification and higher long-term returns than the Indexed Growth Pool, but with modestly higher volatility. This portfolio will be allocated approximately 65% Growth investments (Equities) / 35% Fixed Income investments (Bonds) and will consist of a variety of asset classes including allocations to non-traditional investments like Real Estate and Broad Real Assets, as well as Core U.S. Bonds, Dynamic U.S. Bonds, Global Bonds, and High-Yield Bond Investments. The Growth Pool will also employ a mix of both active and passive (index) approaches to investment management in an effort to enhance returns in the various asset classes. Donors with a long-term mindset can look to the Growth Pool as an opportunity to increase the probability of offsetting annual spending and inflation and thereby sustain the real value of their funds longer into the future.

HJCF Aggressive Growth Pool

Investment Objective for the Aggressive Growth Pool

The 'Aggressive Growth Pool' is a natural extension of the 'Growth Pool' and is designed for donors desiring higher long-term expected returns while also possessing a greater tolerance for market volatility and short-term portfolio drawdowns. This pool will utilize substantially all of the same principles applied to the Growth Pool but will maintain a larger allocation (~85%) to Growth investments (Equities) and a smaller allocation (~15%) to Fixed Income investments (Bonds). Like the Growth Pool, it will also consist of a variety of asset classes, including allocations to non-traditional investments like Real Estate and Broad Real Assets, as well as Core U.S. Bonds, Dynamic U.S. Bonds, Global Bonds, and High-Yield Bond Investments. Donors that invest in the Aggressive Growth Pool should expect the highest volatility of all the pools, but should also expect to be compensated for that volatility in the form of the highest long-term expected returns.
